

901-23-V

NEXT LEVEL LEADER

DESCRIPTION:

The Next Level Leader program is a highly interactive, competency-based program with a strong emphasis on practical application of knowledge. Unlike other leadership courses, this program focuses on scenarios specific to those which employees encounter in our industry.

Using interactive case studies, students will learn how to apply their leadership skills to embrace challenges and opportunities that are common among their peers. Participants will learn valuable tools, without being required to share proprietary information about their firms.

There is no lack of leadership opportunities in the mechanical contracting industry. However, it is often misunderstood that to be a leader, one must be in charge of a team or a department. This program is designed for anyone looking to grow into a leadership position and develop their leadership skills.

HOW YOU WILL BENEFIT:

By providing a path for employees to develop their leadership skills, the Next Level Leader program contributes to motivating, retaining, and developing your organization's leaders early on. The result is a strong leadership base across your organization.

Students will learn how to:

- Better communicate and develop important relationships
- Make changes in your organization
- Develop Emotional Intelligence
- Be an effective team player
- Set realistic goals

MODULES INCLUDE:

- The Foundations of Leadership
- The Building Blocks of Relationships
- Managing Yourself to Peak Performance
- Setting Realistic Goals
- Effective Teams in the Workplace
- Emotional Intelligence (EQ)
- Communications & Influences
- Change: Live it, Love it, Lead it!
- Your Role in a Union Mechanical Contracting Environment

DATES

January 17 - March 26, 2023
(Tuesday/Thursdays)

TIME

10:00 - 11:30 a.m.

LOCATION

All classes will be held
virtually via Zoom

TUITION

\$1,000
